

TREMCO

Tremco Incorporated is a passport provider of AIA/CES programs. Provider number: J157

Extensive Vegetated Roofing System Assembly and Design

Essential Design and Evaluation Techniques for High Performance VRSA

The following subjects will be presented by Tremco's North American Green Roof Manager, Ken McGowan

Learning Objectives:

Green (Vegetated) Roofing– Critical Design Considerations, including Economic and Environmental Impacts

Understand the typical components, their use and importance to the entire system

Recognize the impact of combining roof membrane systems and vegetated roof components that relate to installation and maintenance efficiencies, and positive lifecycle cost outcomes

Learn evaluation techniques to use in decision making of system components leading to efficiency, sustainability, and execution of performance criteria

This one hour presentation qualifies for one AIA learning unit for Sustainable Design
